Data Science & Analytics Project Using ML [\[GitHub\]](#) [\[Certificate\]](#)
EDA on Mobile Brand Sales Dataset and Selling price prediction using and evaluation of different ML algorithm.

PROJECTS

- **Smart Dashboard for Data-Science** [links: \[Live Demo\]](#) [\[GitHub\]](#)
 - **Technologies used:** Python, Machine Learning (Scikit-learn) Libraries, Streamlit, Plotly charts.
 - Developed a dashboard tailored for Data analytics and Model training, having various features related to data-preprocessing, it includes data visualization using charts, automated AI model training and auto-tuning, and data encoding tools. The project is a single web application that combines various tasks related to data science and ML
- **Home-Tree: Digital Home & Family Management Project** [links: \[Live Demo\]](#) [\[GitHub\]](#)
 - **Technologies used:** Nextjs, TypeScript, shadcn-ui, lucid-react, tailwind, mongoose.
 - Developed a full-stack, modern home management project. It features various automations, live shopping lists, an elegant dashboard for task management, messaging, and bill organization, calendar-based notification, medicine tracker, overview, secured user login and verification and family-based grouping.
- **Borrow Labs: Online Modern Library Management System Project** [links: \[Live Demo\]](#) [\[GitHub\]](#)
 - **Technologies used:** Reactjs, Express, Mongoose, JWT, html, CSS.
 - A full-stack, responsive online library management system. It was developed and deployed with integrated functionalities using a cloud-based database (MongoDB Atlas), the concept marks shift from traditional fine based library management to subscription-based tokens for quick borrows and renewal with admin control and separate dashboard for students.
